**SUMMARY**

---

- Application Developer with 1.9 years of experience and good knowledge of Core Java, Spring, Rest API, Jackson, and testing frameworks like Junit.
- Apply in-depth understanding of business and IT requirements to streamline administration and internal processes, resulting in enhanced automation and operational efficiency.
- Awarded achievement of excellence (Rising star of month) for outstanding work deliverables in a time bound manner in the entire account.

---

**COMPUTER SKILLS**

---

Languages: C, Java, Python  
Databases: MySQL  
Version control: Git, Github  
Testing Frameworks: Junit  
Other tools: VScode

---

**EXPERIENCE**

---

**Backend Developer**

May,2021 – Present

***Upskill program at Crio.do*****Projects**

Xurl: Personal project developed to shorten the length of a long URL like bit.ly.

- Developed the logic in core java using concepts such as inheritance. Also implemented the functionality to keep the count every time a short URL is accessed.

*Skills learned: Core java, Inheritance, Java Stack trace, VScode debugging.*

Qmoney: A visual stock analyzer. It helps to make trade recommendation.

- Implemented the core logic of the portfolio manager and published it as library.
- Improved application stability and performance.

*Skill learned: Java, Rest API, Jackson, Interfaces, code refactoring, Gradle, Exception handling.*

**Application Developer**

Feb,2020 – Oct 2021

***IBM***

- Developed application updates in Letter and CMS area for Enrollment and Billing operations for the client Blue Cross Blue shield of Massachusetts.
- Provided technical support for bugs generated during batch jobs cycle once a week every month.

**Projects**

1099 HC Tax Letters: An annual activity involving generation of tax letters for all the subscribers of BCBS for entire Massachusetts state.

- Developed new update to include logic to generate letter regardless of a subscriber state code residence.
- Performed unit testing and integration testing with a dataset of 2 million records without any issues observed.
- Executed the final production run with a input data set of 15 million records without any fixes required.

- Awarded Employee of the month for the contributions to this project.

Letter Suppression: The Business requirements were to suppress 12-13 different types of letters such as create cancellation, PCP welcome, PCP change letter.

- Created a new Cobol code to suppress the letter's generation thus automating the process which was being performed manually by the client.
- Performed unit and integration testing by generating individual letters and checking whether they are suppressed or not.

CMS Cob files: CMS is a third-party vendor which supplies COB (coordination of benefits) raw data for analysis to BCBSMA.

- Developed automation workflow to create split files from the raw data file according to different records type and sharing this to the clients.
- Added functionality to create a mail notification sent to respective person in charge from Client side on successful transfer.

---

## EDUCATION

---

**Maharashtra Institute of Technology**

Jul,2015 - Jul,2019

*Pune, Maharashtra*

- Bachelor of Engineering in Electronics and Telecommunications.  
CGPA– 7.84
